

## Scientific facts and events

O reader, we provide you with facts that are absent from many people, revealed by one of the most brilliant scholars, who accept the news only with evidence.

He said: - One day my eyes and what they watch in this vast universe, full of luminous planets, the sun, the moon, the stars, and the night and the day, all stopped me; who created them, set their laws and organized their planetary paths, with a very precise calculation?

Answer: - Many fair non-Muslim, Muslim scholars investigated the conditions of those celestial bodies and Earth and all it has whether human, animal, plant, water or air, agreed that there's one great creator, who created them and made them the elements of human life.

These are great questions, the greatest of which is about the Creator; What is the Purpose of God's Creation of Man? And for what our great creator made all other creatures? Were they made for nothing or for the man's sake?

The researcher said: - We are not the first human beings, we were preceded by nations that searched this matter, and since the Creator is absent from the eyes of human beings, and the absent one we do not know about him except from him, he is the only one who tells about himself, and it is not necessary to

prove the Creator except by seeing him, but talking about him his actions and words, which proved his existence and greatness,

The conclusive evidence came from the Creator, which one can argue only whose mind is troubled and doesn't believe what he sees with his own eyes and what he hears, and the evidence of the following qualities with which the Creator does not share either of the creatures:

- \* The first (physical) evidence is visible, audible and perceptible.

- \* The second evidence was the approval of all people.

- \* The evidence comes other than the law of mankind, but the act happens by saying that is, he says something to be, and it becomes as he says.

- \* Mankind cannot do it except according to the law of its Creator, by the one the Creator sent to man, and after his death no one can do it.

- \* Evidence occurs at an extraordinary speed that humans cannot do.

attention: - The works of witches that occur from some charlatans are works of the devils of the jinn and just tricks for the eyes of the viewers in a short time, a course of few second. but what the prophets do is real and continues to be perceptible, audible and visible.

The news circulating among nations, by firm evidence, proved that the Creator had sent the books, sent the messengers to each nation, in accordance with its time, and gave the messengers verses of evidence to what they had brought about the Great Creator be believed, and we mention something of

what happened to the nations that preceded us, from the events between the Creator and man, to the law of evidence mentioned above: -

1/ Saleh's people: - God sent the Prophet Saleh to his people, and invited them to worship the Creator, and they said to him, "If there is a true Creator, tell him to create a good, (female camel) with a son, with this stone, they point to a stone in front of them, and do you believe that if the Creator does that? Saleh said. We do what you order us to do, they replied. So, the Prophet Saleh asked the Creator to do it, so Allah created a camel with her son beings from that stone, in front of all gathering people, but they broke the covenant and refused to accept the Prophet and what he sent with him. They killed the camel, and then the Creator punished them with the thunderbolt of all their people. But Saleh, the Prophet and those who believed him survived.

2/ The People of Pharaoh: - The Creator sent them the Prophet Moses. He invited them to worship the Creator. Some of his people responded to his call, others refused and did not accept the message. They fought the Prophet Moses and those with him. They surrounded him at the seaside. The Creator ordered Moses to hit the sea with his stick, and he hit it. The sea was split to twelve ways to Moses and his people, i.e., the sea was confined to Moses and those with him, and they walked on the ground, and pharaoh followed them. When Moses and his people came out of the sea, and Pharaoh and his people entered the sea, the Creator ordered the sea to drown all of them. The Prophet Moses and his people survived, and after Moses and his people came out of the sea, they became in a desert with no water, so the Creator ordered him to hit with his stick a stone in

front of him, so Moses did, then and there gushed forth from it twelve springs, the same number of his tribes.

3/ The people of Isa, peace be upon him - disciples said to their Prophet Isa, can the Creator bring us down a table from heaven? He said, "Don't you believe me? no, but to reassure our hearts, and we know that you believed us, and we will be among the witnesses. So, the Creator brought down a table of food for them, from which they all ate. Jesus used to revive the dead, and heal the blind and the leper by order of the Creator by the Prophet, in front of people, and these acts are characteristic of the prophets, as evidence of what they have come from God.

4/ The people of Saba of Yemen: - They are governed by a woman called Balqis. Prophet Solomon sent to her that she has to attend to him in Palestine, and on her way, the Prophet Solomon asked to bring her throne from Yemen at him, and it was brought in a glance, while the distance between Palestine and Yemen is about two thousand kilometers.

5/ Abraham: - The Creator sent him to his people, with a message, telling them that God is the Creator, the ever-sustaining, the living and the lifetaker. Abraham ordered them to worship God, and God will reward the obedient with paradise, and punishes the sinner with fire. But they did not believe him and threatened him with death, so when Abraham continued to call them so that they may respond. But they were more stubborn and say if Allah has a fire that burns us in it, we will burn you with fire, and tell God to save you from it.

They collected large quantities of firewood, and set fire to burn Abraham in it. They brought him hands and legs tied with ropes. They came near to the fire to throw him in it, but they could not

throw it in it because its heat was so extensive. So, they went to a mountain close to the fire, and put him on a war machine at the time, called catapult and threw it into it. After days the fire was extinguished, and when they came to see Abraham, they found him alive, healthy and healthy, and the fire did not touch him except the ropes, with which they tied his hands and legs, so blessed be Allah, the Creator who supports his Messenger and his decibels.

6/ Lots' people: - God prevented them from fishing only on Sunday, and they did not comply with Allah's command. So, they hunted the fish with a deceitful trick; they put the nets on Saturday and took it on Monday, so God punished them by making them apes, insulting them, and then take their lives all.

7/ The Last Of messenger and the Last Books for the Last Nation: -God has sent the Holy Quran, to the Prophet Muhammad (peace be upon him) to all people. The Qur'an is an integrated approach for the good of the world and the hereafter. It is valid for all times and places. If the approach was provided by God, it will definitely be integrated, it is like the catalog for man with regard to what he does in his life and after his death, and whoever considers this approach, he will find that it is the correct religion, with scientific, mental, transmissive, logic, nature and history evidence, a public religion that does not have secrets that are kept away from the common people. It is the link between man and his creator. His absolute proof formed of the miracle that broke the rules of the universe. It is written in Qur'an that God created the heavens, the earth, man and stages of his development within his mother's womb, where non-Muslim scholars acknowledged that this information is right, and in agreement with what scientists discovered in the modern era,

and they said that all that was mentioned in the Qur'an is not from the kind of words of mankind, where it came from God at a time when there was no science or scientists, nor telescopes or binoculars. It has everything that matters man in his life and his life after death.

The wisdom of sending the messengers and sending down the books: - A test of God for humans, an argument from God on them on the Day of Resurrection, that God informed them that he is the creator, the ever-sustaining, the Life-Giving and the Life-Taker and that he created for them all the elements of a decent life, and showed them the path of dignity, let them choose for themselves, either eternal happiness or eternal misery, and the day of resurrection is the time of the prizes to those who obeyed, and the punishment of those who disobeyed, as God said: - (Did you think that We had created you in play and that you would not be brought back to Us ).

O my dear reader, everything mentioned above in the Qur'an is clearer to you, if you read the translation of the Qur'an and of the Qur'anic miracles, in your language you will see wonders, you will find them on the links at the end of the page.
